Listing of Claims:

Claims 1-14 (canceled)

Claim 15 (previously presented): A method for processing a food product comprising transporting said food product through a plurality of stations including a pasteurization station, pasteurizing the surface of said food product at said pasteurization station by applying a pasteurizing medium to said food product at said pasteurization station and
5 convectively transferring heat from said pasteurizing medium to the surface of said food product at a sufficiently high heat transfer rate such that the surface heat transfer coefficient becomes sufficiently higher than the food product conductance coefficient that the surface temperature is substantially instantaneously elevated above temperatures which are instantly lethal to microbes which may be present, and comprising applying said pasteurizing medium
10 to said surface of said food product with directional jets, and directing said pasteurizing medium at high enough velocity to physically displace said food product and apply said pasteurizing medium to the entire outer surface of said food product.

Claims 16-20 (canceled)

Claim 21 (previously presented): A method for processing a food product comprising transporting said food product through a plurality of stations including a loading station, a pasteurization station, and a closing station, said loading station loading said food product in a package, said pasteurization station pasteurizing the surface of said food product after said
5 loading station, said closing station closing said package with said food product therein after said pasteurization station, and comprising pasteurizing said food product at said pasteurization station with a pasteurizing medium, and directing said pasteurizing medium at
